## **1. Introduction**

The platform will allow the company to “plan and manage effort that seeks to motivate and enable employees to effectively serve community needs through the leadership of the employer.”

**CI (Community investment / corporate social investment / Community social investment) platform** can also be called employee volunteer program, workplace volunteer programs, corporate volunteer programs, company volunteer programs, and other iterations. These programs are typically built to support a company’s larger corporate social responsibility program (CSR) or community engagement program or community investment program. Companies may have specific reasoning for building such platforms like building a positive brand reputation or increasing employee engagement in the community.

### **1.1 Organization Profile**

#### **TatvaSoft**

TatvaSoft House,  
Rajpath Club Road,  
Ahmedabad, Gujarat, 380054

[www.tatvasoft.com](http://www.tatvasoft.com)

Tatvasoft is CMMI maturity level 3 company established in 2001. Tatvasoft is a custom software development company delivering business splendid IT solutions and related services to customers across the globe.

Tatvasoft has successfully served for more than 1800 success stories ranging from enterprise level to startups, who have grown alongside the success of the company.

Tatvasoft has more than 21+ years of technology experience engaging with customers at deeper level to provide cutting edge solutions and innovations.

### **1.2 System Details**

#### **1.2.1 Existing System**

- Volunteer Management: Corporations would manage volunteer programs manually, using spreadsheets or other manual tools. They would manually track volunteer hours, coordinate volunteer events, and communicate with volunteers.
- Employee Engagement: Corporations would rely on manual communication methods, such as meetings and memos, to encourage employee engagement in CSI initiatives. They may use manual methods, such as collection boxes or paper forms, to collect employee application.
- Corporations would manually compile and analyze data on their CSI initiatives, using spreadsheets, reports, and other manual tools. They would manually track the impact of their initiatives and make decisions based on this data.

### **1.2.2 Proposed System**

- Employee Engagement: The website could also be used to engage employees in CSI initiatives. This could include features such as employee volunteering programs and fundraising events. Employees could log their volunteer hours and fundraising efforts on the website, creating a sense of community and encouraging others to get involved.
- Reporting and Analytics: The website could provide detailed reporting and analytics on the company's CSI initiatives. This could include information on the amount of money donated, the impact of the initiatives, and the effectiveness of different programs. The data could be used to improve the company's CSI strategy and identify areas for improvement.
- Volunteers who took part in missions can share their experience to show the impact of company's initiatives effectiveness on society and encourage others to take part in missions.

### **1.3 Scope of System**

- User Registration and Management: The platform will allow users to register and create their profiles, which can be updated or deleted as required.
- Mission Management: The platform will enable admin to create and manage social projects, including their objectives, contribution, registration, timelines, and outcomes.
- Collaboration and Networking: The platform will facilitate collaboration and networking among users, enabling them to share practices, ideas, and resources through their stories.
- Marketing and Promotion: The platform will be marketed and promoted to attract users, including through social media, email marketing, and other digital channels.
- Report and Analysis: The platform allows the admin to get current information about their missions, users, queries, initiatives and their progress.

## **1.4 Objectives:**

- CSI platform will be used to maintaining all CI related records in organized manner.
- Promoting social development.
- Collaboration and networking.
- Enhance brand reputation
- Creating sustainable impact
- Managing missions
- Volunteer engagement

## **2.1 Proposed System Requirement Gathering**

### **2.1.1 Stakeholder of the system**

1) Admin

2) Volunteers

3) Visitors

#### **1) Admin**

- Login
- Manage missions
- Manage initiatives
- Manage volunteer stories
- CMS
- Mission theme
- Mission skills
- Mission applications
- Banner management
- Volunteer time-sheet management
- Manage different types of missions
- Manage user queries

#### **2) Volunteers:**

- Registration & Login
- Forgot password
- Edit profile
- Participate as volunteer in mission's
- Rating
- Comments
- Add to favourites
- Share your story
- Time-sheet management
- Recommend mission to co-workers
- Recommend story to co-workers
- Send query to admin

### **3) Visitors:**

- View missions
- View stories
- View Feedback
- View rating
- View mission details

### **2.2.2 Requirement Gathering Techniques Used**

There are many techniques to gather information about system requirements such as:

- 1) Examining Documentation
- 2) Interviewing
- 3) Observation
- 4) Research
- 5) Prototyping
- 6) Questionnaire

Here we use Questionnaires and Observation techniques to gather requirements of our System. Questionnaires are much more informal and it is good technique to gather requirements from stakeholder in remote location or those who will have only minor input of the overall requirements. With using Questionnaires, we get following questions and answers:

#### **→ Questionnaire asked to admin:**

1. Why you want to digitalize your system?
2. Is there any web-based system for your organization?
3. Where would the user access this system?
4. What is the problem in current system?
5. What functionality do you want in proposed system?
6. Why are you moving on web to manage your system?
7. What is your ultimate vision to moving on digital platform?

#### **→ Questionnaire asked to employee(volunteer):**

1. Which feature do you want to have in the system?
2. When you are going to use the system?
3. Is this system will be helpful?
4. When you will not like the system?
5. What are the current problems you are facing without web application?

## **2.3 Consolidated List of Requirement**

- Admin can manage overall website and volunteer database.
- Admin can manage registered volunteers, stories and missions.
- Admin can track mission progression.
- Manages volunteer time-sheet.
- Manages mission themes and skills.
- Content management pages.
- Manages contact queries.
- Banner management.
- User stories management by admin.
- User can register and login in web-application.
- User can edit his/her profile.
- Add/Remove skills.
- Sending and receiving recommendation via e-mail.
- In order to participate as volunteer, requires login.
- Collaboration and networking with share stories.
- Add missions to their favourite.
- Ask queries to admin using contact-us.

## **2.4 Project Definition:**

Corporate Social Investment Platform

The platform will allow the company to plan and manage effort that seeks to motivate and enable employees to effectively serve community needs through the leadership of the employer. This platform will support larger companies corporate social responsibility. Companies may have specific reasoning for building such platforms like building a positive brand reputation or increasing employee engagement in the community.

## **3. System Management and Planning**

### **3.1 Feasibility Study**

A feasibility study is carried out to select the best system that meets performance requirements. The main aim of the feasibility study is to determine that it would be financially and technically feasible to develop the product or not. The purpose of feasibility study is not to solve the problem, but to determine whether the problem is worth solving.

#### **3.1.1 Technical feasibility**

Technical feasibility study compares the level of technology available in the software development firm and the level of technology required for the development of the product. Here the technology consists of programming language, hardware resources and other software tools.

##### **Why our system is technically feasible?**

- ◆ Our system just requires window operating system, normal browser and Internet.
- ◆ It is web-based user interface. Thus, it provides an easy access to the user.
- ◆ No special hardware or software is required.
- ◆ There is no need to purchase any type of server so that all data that are needed to running system available there.
- ◆ The system is stable and established, resources are easily available /accessible and also expertise is available.

#### **3.1.2 Economical Feasibility:**

Economical feasibility study evaluates the cost of the software development against the ultimate income or benefits gets from the developed system. There must be scope for profit after the successful completion of the project.

##### **Why our system is economically feasible?**

- ◆ As there is no paperwork required so it reduce the cost of working it manually.
- ◆ High increase in the amount of effectiveness earned by going global.
- ◆ All people are aware of new technology so there is no problem to run the system and no special skills are required.

- ◆ Only one-time development is required for this kind of system and if we want to expand it in future no more extra investment needed.
- ◆ Easy and cheap maintenance of the system.
- ◆ So that this system is economically feasible.

### **3.1.3 Operational feasibility:**

Operational feasibility is a measure of how well a proposed system solves the problems, take advantages of the opportunities identified during the scope of definition and how it satisfies the requirements identified in the requirements analysis phase of system development.

#### **Why our system is operationally feasible?**

1. Our system is developed in such a way that would be easy to understand and operate.
2. The system interface is standard, user friendly and provides extensive help.
3. No special training is required.
4. System will be able to solve the business-related problem and satisfy user requirements.
5. User friendly GUI.
6. So, the system is operationally feasible.

### **3.2 Hardware – Software requirement:**

#### **➤ Hardware requirement**

##### *Server side requirements*

Processor	Minimum Core i3
RAM	4 GB
Hard Disk	512 GB

##### *Client side requirements*

Processor	Minimum Core i3
RAM	1 GB

## ➤ Software Requirement

*Server side requirements*

Operating System	Windows
Web Server	IIS Express
Database	SQL Server

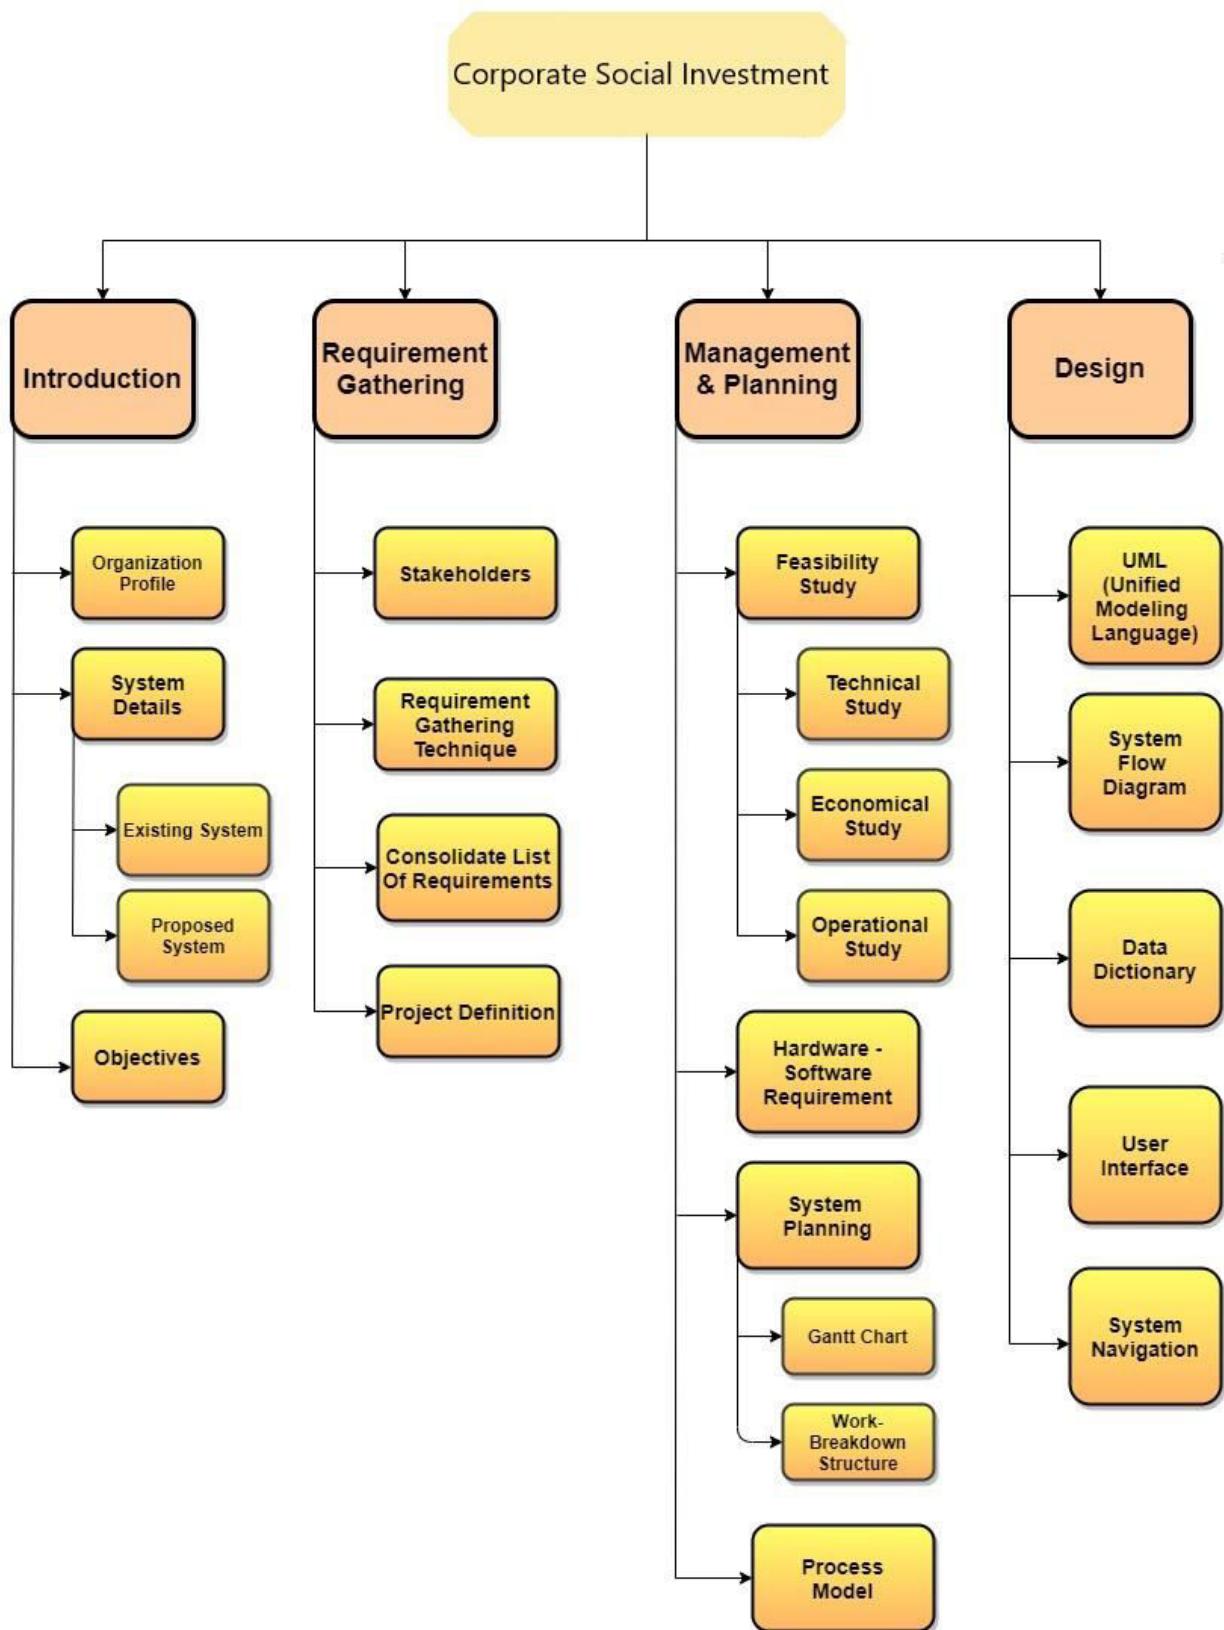

*Client side requirements*

Operating System	Any
Web Browser	Chrome, Firefox, Edge, Safari, Opera

## 3.3 System Planning

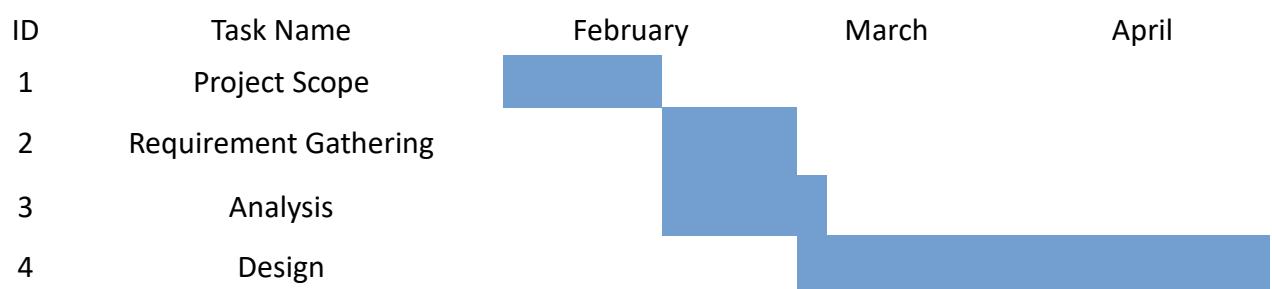

### 3.3.1 Work Breakdown Structure

- Dividing complex projects to simpler and manageable tasks is the process identified as Work Breakdown Structure.
- Usually, the project managers use this method for simplifying the project execution.
- In WBS, much larger tasks are broke down to manageable chunks of work. These chunks can be easily supervised and estimated.
- Following are a few reasons for creating a WBS in a project:
  - Accurate and readable project organization.
  - Accurate assignment of responsibilities to the project team.
  - Indicates the project milestones and control points.
  - Useful for estimating the cost, time and risk.
  - Illustrate the project scope, so the stakeholder can have a better understanding of the same.

### 3.3.2 Gantt Chart

1. Gantt chart is a type of a bar chart that is used for illustrating project schedules. Gantt charts can be used in any projects that involve effort, resources, milestones and deliveries.
2. At present, Gantt charts have become the popular choice of project managers in every field. Gantt charts allow project managers to track the progress of the entire project. Through Gantt charts, the project manager can keep a track of the individual tasks as well as of the overall project progression.
3. In addition to tracking the progression of the tasks, Gantt charts can also be used for tracking the utilization of the resources in the project.

### 3.4 Process Model

#### Incremental Model:

As new requirements can arise in future incremental models are used. With the help of it we can fulfil maximum user requirements. In every increment the needs of the client are kept in mind and more features and functions are added. These increments form a base for customer evaluation. Many features can be added after the development of the system that serves the main purpose. If there is a smaller number of employees to work on the project Incremental development model is very useful to complete the project before the deadline.

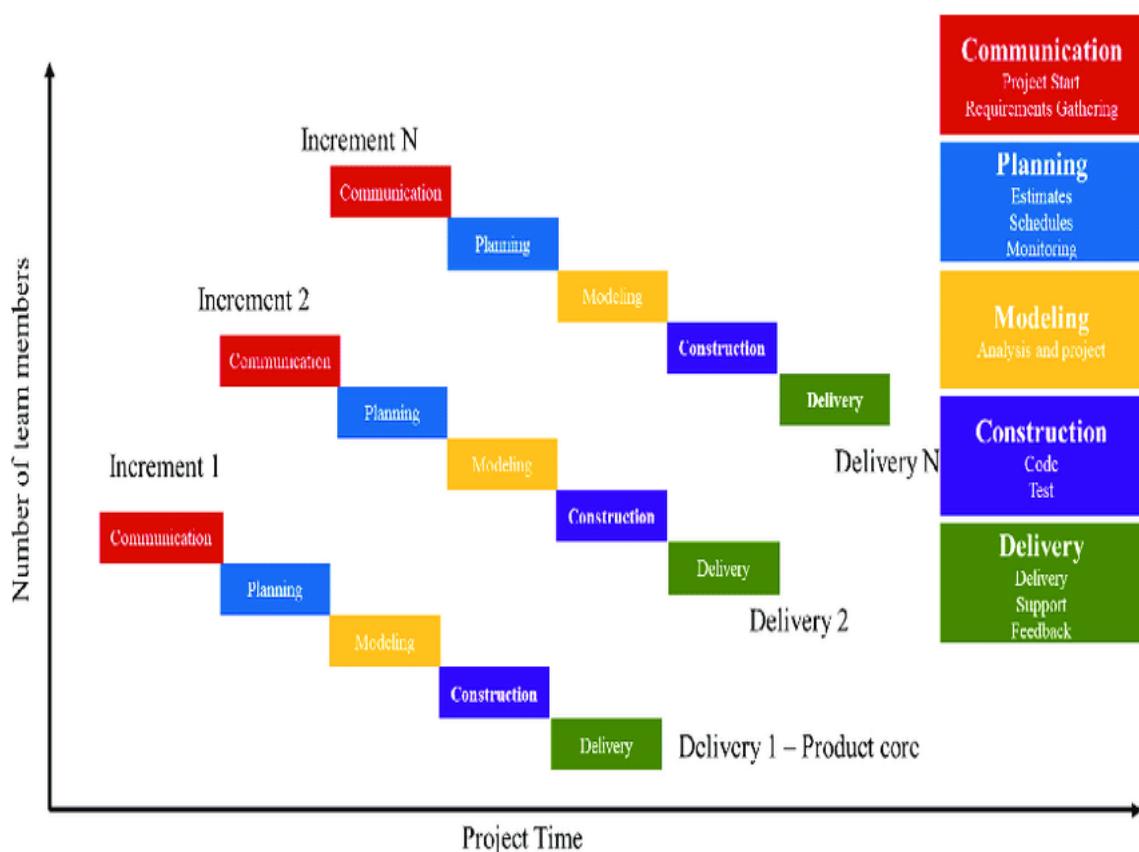

#### ● Advantages:

1. This model is more flexible – less costly to change scope and requirements.
2. It is easier to test and debug during a smaller iteration.
3. In this model customer can respond to each built.
4. Lowers initial delivery cost.
5. This process model helps to manage technical risks.
6. Initial product delivery is faster.

7. Work load is less.
8. Customer can respond to feature and review the product.
9. Risk of changing requirement is reduced.
10. Core product is developed first that is main functionality is added in the first increment.

- **Disadvantages:**

1. Requires good analysis.
2. Resulting cost may exceed the cost of the organization.
3. Each phase of iteration is rigid and not overlaps each other.
4. As additional functionality is added to the product, problems may arise related to systems.
5. May arise related to system architecture which were not evident in earlier prototypes.

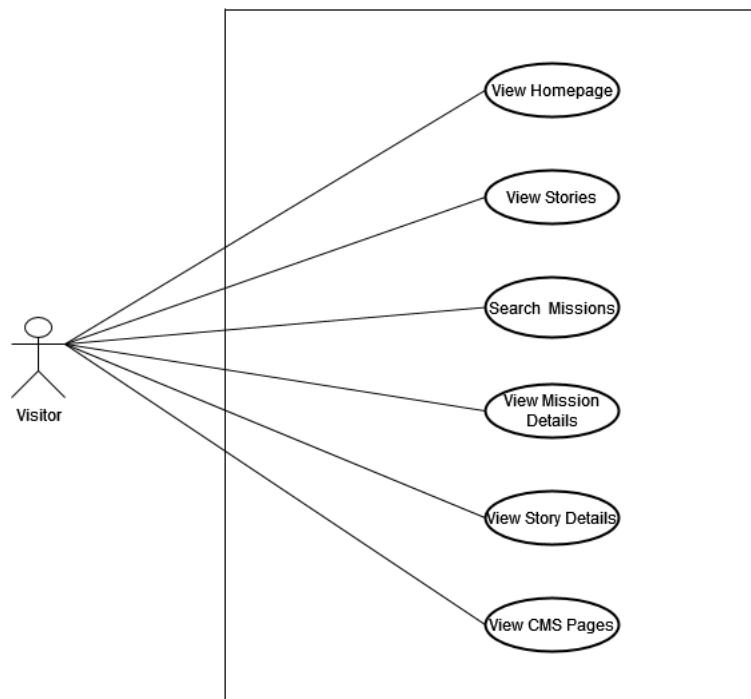

## 4. System Analysis and Design

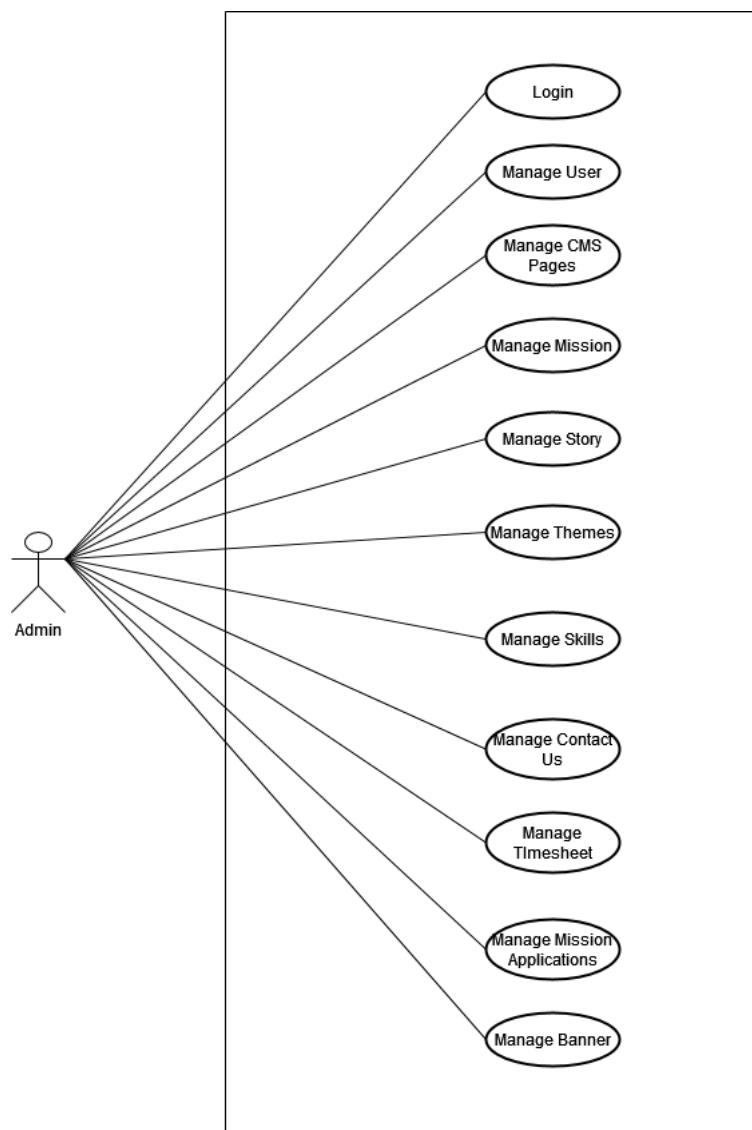

### 4.1 UML

#### 4.1.1 Use Cases

We use these technologies for a number of purposes, such as:

- But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain.
- At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque excepturi sint occaecati cupiditate non proident, sunt in culpa qui officia deserunt mollitia animi.
- On the other hand, we denounce with righteous indignation and dislike men who are so beguiled and demoralized.
- But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain.

## ● Volunteer timesheet

The screenshot shows a user profile for "Evan Donohue" with options to "Add Profile", "Volunteering Timesheet", and "Log Out". The main area is titled "Volunteering Timesheet" and contains two sections: "Volunteering Hours" and "Volunteering Goals".

**Volunteering Hours**

Mission	Date	Hours	Minutes	Actions
Environment Conservation	22/02/2022	1h	30min	

**Volunteering Goals**

Mission	Date	Action	Actions
Plantation Programme	22/02/2022	0	
Education Programme	22/02/2022	1	

## ● Volunteer Hours Entry

The screenshot shows a web-based application interface. At the top, there is a navigation bar with links for 'Stories', 'News', and 'Policy'. On the right side of the navigation bar, there is a user profile icon for 'Evan Donohue' with a dropdown arrow.

The main content area features a modal dialog titled 'Volunteering Timesheet'. The dialog has a light gray background and contains the following fields:

- Mission:** A dropdown menu currently set to 'Faith Community Fellowship'.
- Date Volunteered:** A field labeled 'Select Date' with a small calendar icon.
- Hours:** A field labeled 'Enter Spent Hours'.
- Minutes:** A field labeled 'Enter Spent Minutes'.
- Message:** A large text area labeled 'Enter your message'.

At the bottom of the dialog, there are two buttons: 'Cancel' and 'Submit'.

At the very bottom of the page, there are links for 'Privacy Policy', 'Cookie Policy', and 'Terms of Use'. On the right side, there is a copyright notice: '© 2019 Optmyz.com. All rights reserved.'

## ● Volunteer Goals Entry

The screenshot shows a web application interface with a dark background. At the top, there is a navigation bar with links for 'Stories', 'News', and 'Policy'. On the right side of the top bar, there is a user profile icon for 'Evan Donohue' with a dropdown arrow.

The main content area has a title 'Volunteering Timesheet'. Overlaid on this is a white rectangular form titled 'Please input below Volunteering Goal'. The form contains the following fields:

- Mission:** A text input field containing the text 'Plantation and Afforestation Programme'.
- Actions:** A text input field containing the text 'Enter Actions'.
- Date Volunteered:** A text input field containing the text '04-11-2019'.
- Message:** A text input field containing the text 'Enter your message'.

At the bottom of the form are two buttons: 'Cancel' (in a grey box) and 'Submit' (in an orange box).

At the very bottom of the page, there are links for 'Privacy Policy', 'Cookie Policy', and 'Terms of Use'. On the right side, there is a copyright notice: '© 2019 Optmyz.com. All rights reserved.'

At the bottom right, there is a pagination control with buttons for navigating between pages.

### ● CMS Pages

The screenshot shows a CMS Page management interface. On the left is an orange sidebar navigation menu with the following items:

- User
- CMS Page** (highlighted)
- Mission
- Mission Theme
- Mission Skills
- Mission Application
- Story
- Banner Management

The main area is titled "CMS Page" and displays a table of CMS pages. The table has columns for "Title", "Status", and "Action". The "Status" column contains "Active" for all rows. The "Action" column includes icons for edit and delete.

Title	Status	Action
Desktop publishing software like Aldus PageMaker including versions the leap into electronic typesetting.	Active	
Various versions have evolved over the years Many desktop publishing packages and web page editors	Active	
A Latin professor at Hampden-Sydney College in Virginia,	Active	
Suffered alteration in some form, by injected humour, or randomised words	Active	
Et harum quidem rerum facilis est et expedita distinctio.. very popular during the Renaissance.	Active	
Maiores alias consequatur aut perferendis doloribus asperiores repellat	Active	
Our power of choice is untrammeled and when nothing prevents obstet.	Active	
Beguiled and demoralized by the charms of pleasure of the moment.	Active	
Untrammeled and when nothing prevents our being able to do what we like best .10.32 and 1.10.33 from "de Finibus Bono".	Active	
Oluptates repudiandae sint et molestiae non recusandae.	Active	

At the bottom right of the table are navigation icons for page numbers (1, 2, 3, 4, 5, >, >>).

Oluptates repudiandae sint et molestiae	Goal	02/12/2021	12/12/2021	

## ● Mission Application

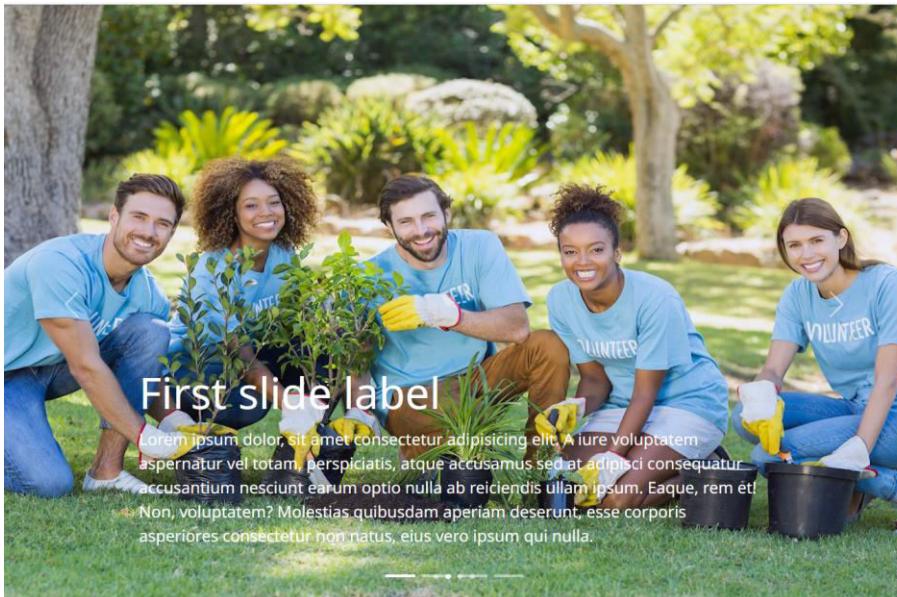

The screenshot shows a user interface for managing mission applications. On the left is a vertical orange navigation bar with icons for User, CMS Page, Mission, Mission Theme, Mission Skills, Mission Application (which is selected and highlighted in orange), Story, and Banner Management. The main area has a white header with the date "Thursday, November 3, 2022, 10:06 AM" and a user profile for "Evan Donohue". Below the header is a search bar and a table titled "Mission Application". The table has columns for Mission Title, Mission Id, User Id, User Name, Applied Date, and Action. The data in the table is as follows:

Mission Title	Mission Id	User Id	User Name	Applied Date	Action
Desktop publishing software	5164978456	1364978456	Adam Baldwin	15/02/2019	✓ ✘
Various versions have evolved over	5164975623	1364975623	Peter Wallace	20/02/2020	✓ ✘
A Latin professor at Hampden-Sydney	5164975656	1364975656	Jacob Dunn	24/06/2020	✓ ✘
Suffered alteration in some form	5164974556	1364974556	Peg Legge	08/08/2020	✓ ✘
Et harum quidem rerum facilis est.	5164974569	1364974569	Aida Bugg	09/06/2021	✓ ✘
Maiores alias consequatur aut	5164974556	1364974123	Olive Yew	19/06/2021	✓ ✘
Our power of choice is untrammelled	5164974123	1364974471	Peter Wallace	05/06/2021	✓ ✘
Beguiled and demoralized by the charms	5164974471	1364974461	Teri Dactyl	05/08/2021	✓ ✘

- Add to favourites

The screenshot shows the optimy app's mission listing screen. At the top, there are navigation links for 'Stories' and 'Policy'. On the right, there are 'Login' and 'Register' buttons. Below the navigation, there is a search bar labeled 'Search Mission...'. The main content area displays several mission cards. One card is highlighted with a light gray background and has a large 'i' icon above it, indicating it requires login. The card title is 'Mission Title 1 - Education purpose' and it includes a short description and a 'NGO' badge. To the right of this card, a modal dialog box is displayed with the heading 'Login Required!' and the message 'You need to login before adding favourite mission.' It contains an 'OK' button and a 'Login Here' link. Other mission cards visible include 'Education purpose' and 'Mission Title 3 - Education purpose'.

- Star rating

### ● Add comment

The screenshot shows a comment input field with placeholder text 'Sample'. Below the input field is a red error message: 'Comment should be more than 8 character!'. To the right of the input field is a 'Post Comment' button with an orange border. Below the input field, a message says 'There are no comments at the moment'. To the right, there's a sidebar titled 'Information' with fields for 'Skills' (Archeology), 'Days' (Weekend), and 'Rating' (3 stars). Below this is a 'Recent Volunteers' section showing profiles for Robin Christ and John Statham, with a note '1 - 2 Volunteers of 3'.

## **7. Summary**

### **7.1 Assumptions**

- ➔ User should remember his/her email ID & password for login.
- ➔ Primary knowledge of operating system.
- ➔ User should be able to run system properly.
- ➔ Admin is using this system for managing various aspects such as users, cms pages, stories, missions, banners, skills etc.

### **7.2 Limitations**

- ➔ If the user might not able to deal with English language then user might not able to use the system efficiently.
- ➔ There can be lack of system security, reliability Community.
- ➔ Only Admin can manage this system there is no employee panel.
- ➔ Managing users time-sheet manually.
- ➔ Authenticity of user entered details.
- ➔ Only admin can manage missions.
- ➔ No direct communication between NGOs.

### **7.3 Future scope:**

- ➔ Online donation options on different platform.
- ➔ Communication between NGOs and administration.
- ➔ Users can submit their ideas for missions and initiatives.

### **7.4 Conclusion:**

Main concern for developing Corporate Social Investment platform to streamline the social responsibilities of the company towards the society. This project is proposed to be implementing to replace manual paper work. Encourage employees to engage with society and contribute. Digitizing the process of from volunteer registration to mission end, user management, CMS

management and other aspects of system. I know I might have made some mistakes knowingly or unknowingly. But all the suggestions regarding to this system are always welcome.
